Today's Discussion

Overview

- Clarify Key Terms
- Discuss the Pros and Cons
- Provide Examples
- Discuss how this may be used in our community.

Clarify Key Terms

Some common terms should be defined for our discussion today...

- Community
- Built Environment
- Redevelopment
- Mixed Use Development
- Overlay Zoning District

Community

Community — An area consisting of residential, institutional, and commercial uses sharing a common identity. (Renton, Wash.)

Built Environment

• Built Environment The elements of the environment . . . that are generally built or made by people as contrasted with natural processes. (Renton, Wash.)

Redevelopment

Redevelopment -

- Any proposed expansion, addition, or major facade change to an existing building, structure, or parking facility. (Wheeling, Ill.)
- Any rebuilding activity which has no net increase in built-upon area or which provides equal or greater stormwater control than the previous development. (Concord, N.C.)

Mixed Use Development

Mixed-Use Development -

- The development of a tract of land or building or structure with two or more different uses such as but not limited to residential, office, retail, public, or entertainment, in a compact urban form. (Lake Elsinore, Calif.)
- A project which integrates a variety of land uses including residential, office, commercial, service, and employment and can result in measurable reductions in traffic impacts. (San Juan Capistrano, Calif.)

Mixed Use Development

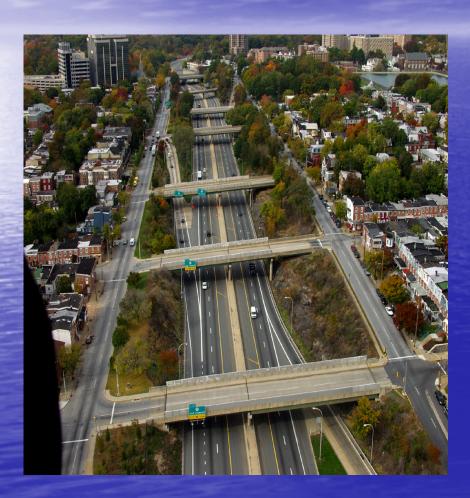

- A proposed development that includes primary non-residential and primary residential uses on the same development site. (Concord, N.C.)
- A tract of land or building or structure developed for two or more different uses such as, but not limited to, residential, office, manufacturing, retail, public, or entertainment. (Schaumburg, Ill.)

Overlay Zoning District -

- An area where certain additional requirements are superimposed upon a base zoning district or underlying district and where the requirements of the base or underlying district may or may not be altered. (Milwaukee, Wisc.)
- A special district or zone which addresses special land use circumstances or environmental safeguards and is superimposed over the underlying existing zoning districts. Permitted uses in the underlying zoning district shall continue subject to compliance with the regulations of the overlay zone or district. (Merrimack, N.H.)

- A zoning district to be mapped as an overlay to a use district and which modifies or supplements the regulations of the general district in recognition of distinguishing circumstances such as historic preservation, wellhead protection, floodplain or unit development while maintaining the character and purposes of the general use district area over which it is superimposed. (Lancaster, Ohio)
- Provides for the possibility of superimposing certain additional requirements upon a basic use zoning district without disturbing the requirements of the basic use district. In the instance of conflicting requirements, the stricter of the conflicting requirement shall apply. (Racine County, Wisc.)
- A district established by ordinance to prescribe special regulations to be applied to a site in combination with the underlying or base district. (Blacksburg, Va.)
- Zoning districts that extend on top of more than one base zoning district and are intended to protect certain critical features and resources. Where the standards of the overlay and base zoning district are different, the more restrictive standards shall apply. (Hilton Head, S.C.)

How is this planning tool is used?

As the various definitions imply; this tool may be used to preserve natural and historical resources, provide restrictions, lessen certain requirements and rebuild a community.

The Pro's

- Flexible Zoning Tool
- Preserves Natural and Historical Features
- Promotes and allows for redevelopment
- Provides for mixed housing and commercial uses

The Con's

- To restrictive or not restrictive enough
- Conflicts with other zoning codes
- Loss of community
- Cost of development and implementation

So, why use them at all?

- The positives can and often do out weigh the negatives.
- They provide flexibility to promote economic development and community enhancement.
- It requires a BALANCE!

Overlay Zoning District Example

..., want for election results to be tallied.

Rehoboth officials get ball rolling on mixed-use zoning

By Ryan Mavity

ryanm@capegazette.com

A new mixed-use zoning category may be coming to Rehoboth Beach, as city officials have begun preliminary discussion of a new commercial/residential zoning.

The issue of mixed-use zoning is contained in the 2004 comprehensive development plan, but it was never defined. When the Oak Grove Motor Court and the surrounding land were rezoned residential, opponents said the rezoning offered the perfect opportunity to explore mixed use.

And while it is too late for Oak Grove. city officials are now starting the process of defining mixed-use zoning,

Commissioners Pat Coluzzi, Kathy McGuiness and Lorraine Zellers have been at the forefront of the mixed-use zoning discussion. Coluzzi said it was time for the issue to be looked at because mixed-use zoning is likely to be in the 2009 update of the comprehensive plan.

Coluzzi said the commissioners are gathering information about other municipalities with mixed-use zoning. The city's planning commission has also begun discussion of a mixed-use zoning category.

Coluzzi said her idea was for two types of mixed-use zoning, M-l and M-2. M-l would cover mixed commercial and residential entities within a structure, while M-2 would be mixed use within an area. Coluzzi said she did not have any specific areas within the city in mind for mixeduse zoning, at least not until the language is fleshed out, although she said the parcel where Gold's Gym is located, known as the Bay Mart property, would be one idea.

Commissioner Paul Kuhns said the city missed an opportunity to examine mixeduse zoning for Oak Grove but now is the time to think about defining exactly what

Kuhns said Rehoboth and Wilmington avenues were two places where there is an opportunity for mixed-use zoning with commercial properties, as well as poten-es. tial for residential apartments or rooms upstairs from the businesses.

Kuhns said upstairs apartments would be perfect for student or worker housing because they would no longer have to ride bikes on Route I or drive to get to work.

Still, Kuhns said, the city needs to further define mixed-use zoning and where in the city it can be done.

Commissioner Stan Mills said the term mixed use is misleading and that the city needed to look at all its existing codes. He said his idea of mixed-use zoning was a predominately residential area with select commercial entities, such as a small office or diner.

Mayor Sam Cooper said he did not know where the discussion would lead,

mixed-use at all. The city's C-1 commercial zoning already allows for residential uses, as well as almost all commercial us-

Cooper said he didn't know if mixed use would be "commercial lite," basically C-L zoning but with some uses, like a billiard hall, removed.

Cooper said he sees mixed-use zoning where there are large residential areas or places that have sidewalks and wide streets. He said this is why he didn't think Oak Grove was a good candidate for mixed-use zoning, since there are no sidewalks.

Cooper said Oak Grove was also a special case because the area had already defined itself as being heavily residential. Finally, he said the nature of Rehoboth itself doesn't lend itself to mixed-use zoning because of its seasonal nature.

"Rehoboth is a different creature,"

Overlay Zoning District Example

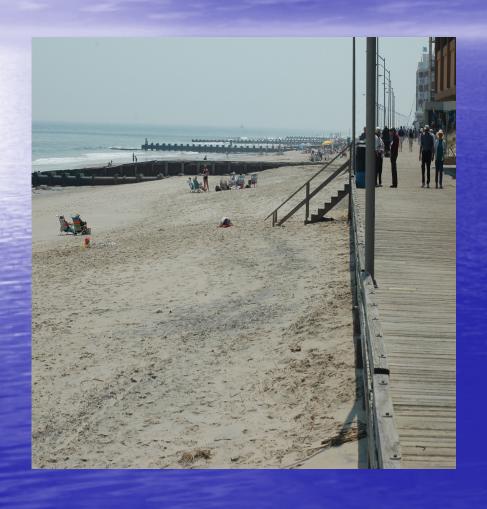

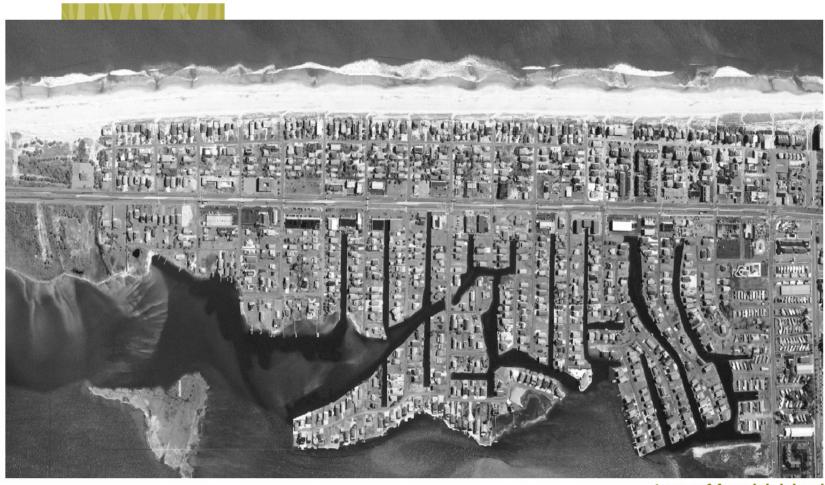

- Lewes for Historical Preservation
- Slaughter Beach for Environmental Protection
- Dagsboro and Ellendale for defining a Town Center
- Georgetown and Sussex County for Economic Development

How might this tool be used in Fenwick Island?

town of fenwick island

comprehensive plan november 2007

built

built environment overview

the first cottages began to dot the fenwick island landscape in the 1930's

the original cottages were of simple construction with no electricity or running water

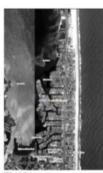

as infrastructure and access

improved into the 1940's, fenwick island began to grow rapidly in a town pattern of lots and blocks

the land area of town has been changed by dredging, filling, and shore stabilization

draft community character - built environment

fenwick island comprehensive plan

residential development

while there is a great diversity of architectural styles in town, the original character and scale of small, cottage-style houses is at risk of being lost

residents and visitors enjoy the quiet nature of the residential streets

some recent development is maximizing lot coverage and is out of scale with older development

commercial development

commercial areas consist of a vehicular dominated environment with few pedestrian amenities

a majority of the buildings are single-story, and many are aging and will most likely be redeveloped

built environment key points

residents and visitors are attracted to fenwick island by its quiet and relatively compact built community character

many elements of fenwick island's historic development patterns are still evident

built development patterns heavily influence fenwick island's natural environment

the working group noted that future development and redevelopment should be consistent with the desired community character

draft community character - built environment

redevelopment overview

the first residential cabins began to dot the fenwick island landscape in the 1930's

improved access and infrastructure led to rapid growth through the 1990's

from 1990 to 2000, fenwick island's population increased sharply while construction of new housing units was almost

with aging structures and increasing land values, fenwick island is ripe for redevelopment

residential redevelopment

there is no maximum lot size

Year	Permits Issued	New Construction	Major Remodel/ Addition	Demolition' Move House	Small Projects
2001-2002	151	15	10	0	128 H commercial
2002-2003	143	16	16 (1 commercial)	8	105 (5 commercial
2003-2004	137	23	11 (1 commercial)	13	90 (5 commercial)
2004-2005	124	15	12 (1 commercial)	12 (1 commercial)	85 (8 commercial)
2005-2006	101	10 (2 commercial)	4	4	80

since 2001, 50 major residential remodel projects and 46 residential demolition/house relocation projects have been completed

increasing property values and current housing design trends are spurring residential redevelopment

the majority of new homes are considerably larger than more historic structures, often maximizing lot coverage

new floor area cap limits new homes to 7500 sf or 70% of total lot area, whichever is less

draft redevelopment overview

commercial redevelopment

recent commercial development projects have continued a highwayoriented development pattern

vacant commercial properties have developed as residential units

commercial properties do not generate additional property taxes for the town compared to residential properties

vacant and residential uses interrupt the commercial area's continuity

since 2001, five major remodels or demolitions and two new construction projects have occurred on commercial properties

redevelopment key points

redevelopment can help unify or compromise fenwick island's community character

redevelopment will gain momentum as vacant lots build out and developed properties age

at the current pace, the remainder of fenwick island's vacant lots will be developed by 2013

the working group noted an opportunity to change development patterns as properties redevelop

LEGEND

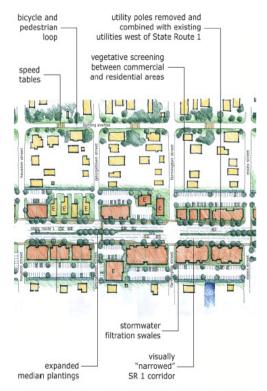

Overlay District

The proposed overlay district brings together a group of planning tools to achieve many of the desired goals articulated through the comprehensive planning process. Use of the overlay district allows the Town greater flexibility in promoting alternative development designs as commercial properties develop and redevelop over time. Currently, many Town code provisions serve as barriers to achieving the desired family-oriented, small town and quiet resort character along SR 1.

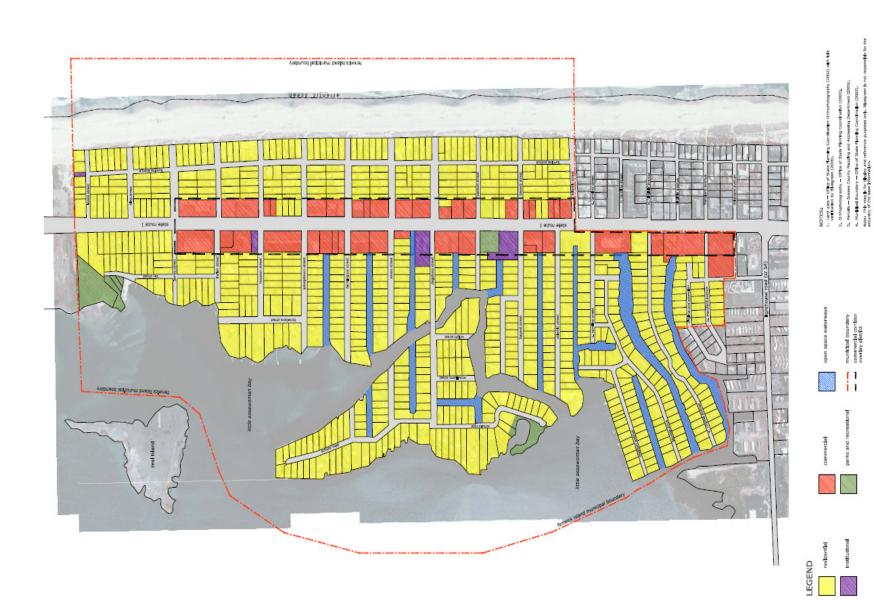

Use of the overlay district offers a number of important benefits for the community, for residents, for property owners, for visitors and for business owners. Success of the overlay district depends on close cooperation between the Town and the property owners. It requires a champion to initiate the overlay district, fight to ensure it is done right and is followed through to completion. The best champions are multi-headed, representing both public and private interests. Combining the State's, County's and Town's planning, coordination, infrastructure and public financing capabilities with the private sector's entrepreneurial savvy, retailing know-how, development expertise and private capital creates the environment necessary for the community to realize its articulated goals.

Overlay districts are used successfully in other resorts and small towns to achieve goals similar to those articulated in this plan. Success is measured in tangibles such as increases in retail and restaurant sales. Business owner and/or tenant investments are evidenced in higher valuations for remodel building permits. A key success measurement is that property redevelopments and private sector reinvestments surpass public investments. Improvements in parking and local traffic conditions are determined through parking and traffic studies. Intangible evidence of success includes a more attractive and comfortable environment and places where people can meet and spend time.

This portion of the Commercial Subarea Plan illustrates several potential improvements to SR 1 and adjacent properties.

Summary

- Overlay Zoning Districts are a flexible.
- These are often use to define community.
- These promote mixed use development and allow for mixed land use types to occur in concert.
- Requires a balance of issues and educational outreach to the community.
